Tripper Ornaments

01 Indicators

02 Hands

03 Icons

04 Banderoles

05 Patterns

Tripper Ornaments belongs to the stencil font family Tripper Pro; you know, that typeface without any curves.

Tripper Ornaments contains of just one style, but has many versatile characters. Every glyph has a specific function, and belongs to one of these five categories. Small amount of glyphs, large amount of possibilities.

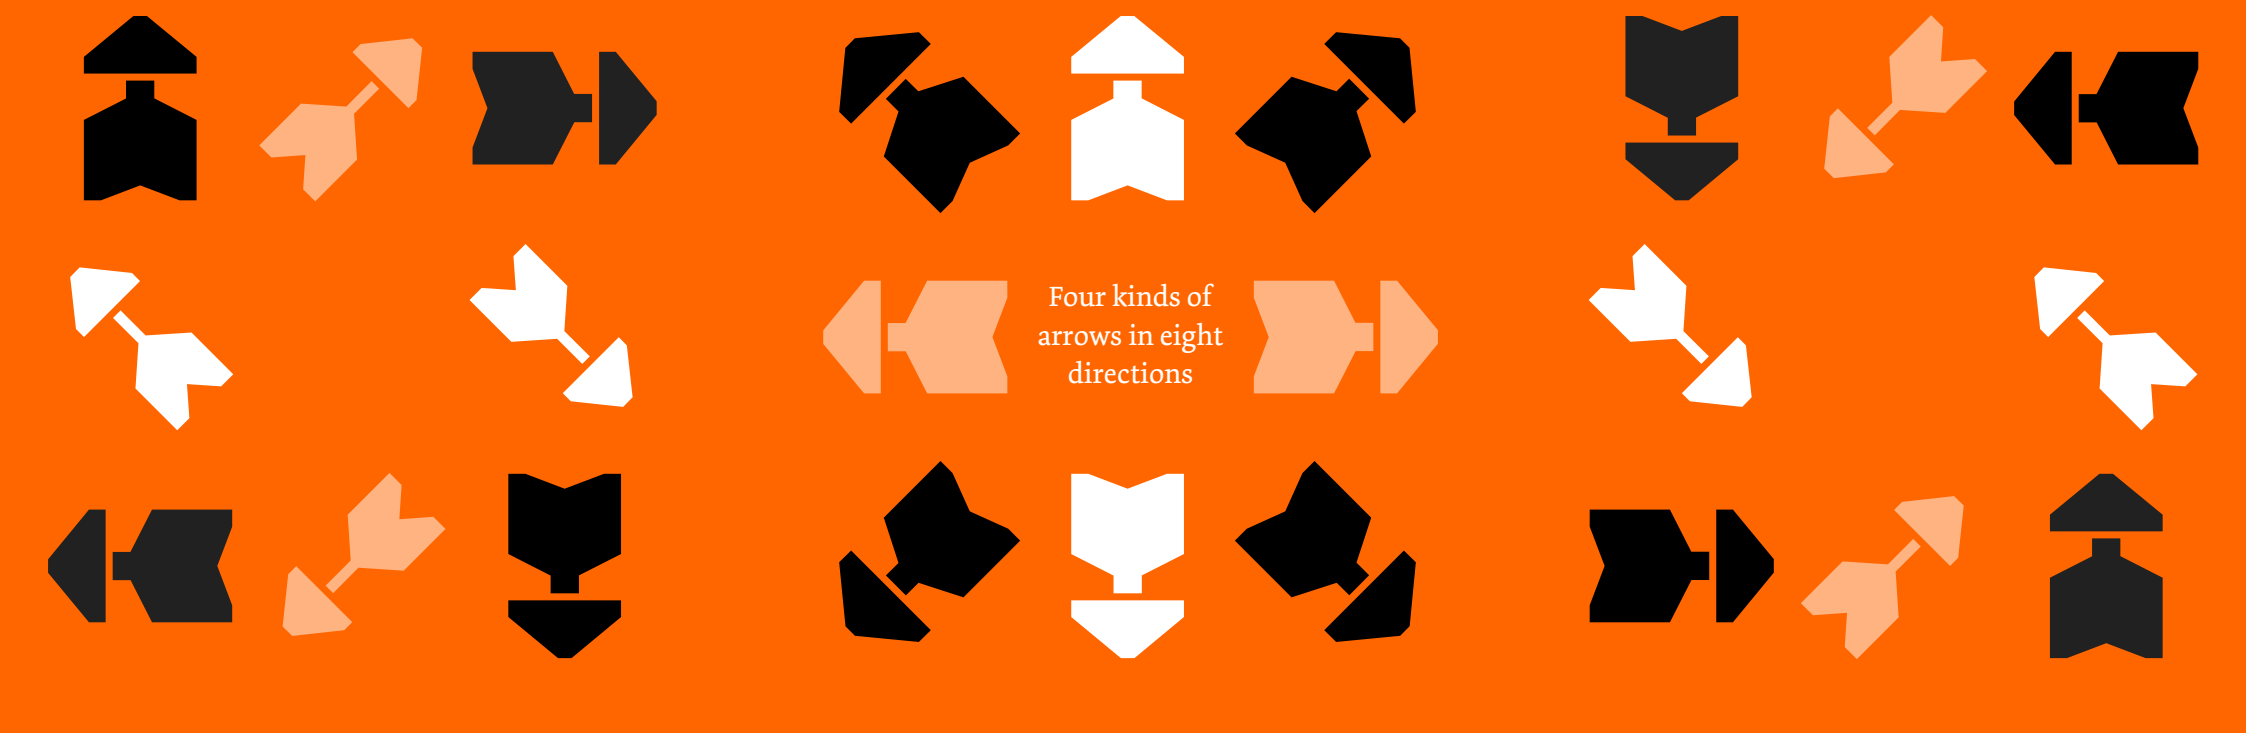

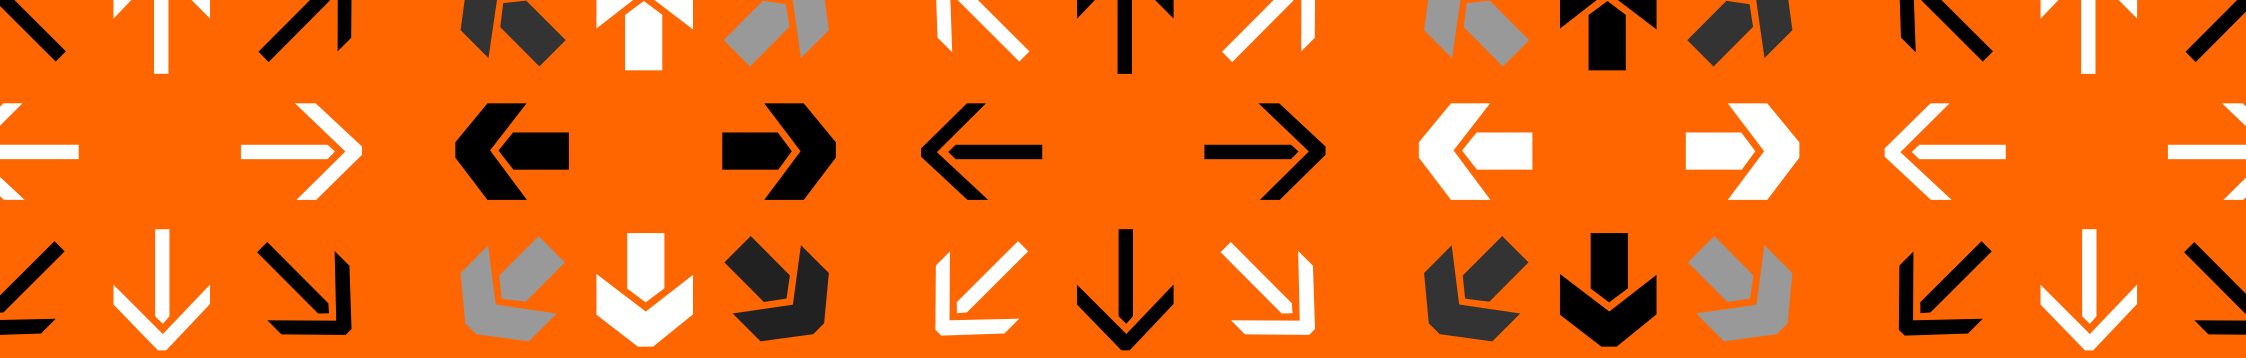

In this overview you will see the character under which you can access a glyph at your keyboard. Easy and practical. Nerds don't have to worry, because those glyphs which have an own Unicode are added twice to the font: once under an easy accessible key and once under its own Unicode, so your website won't look like it was made by your 12-year old nephew.

In case you are looking for a specific glyph and can't find it at your keyboard: just copy-paste from this PDF.

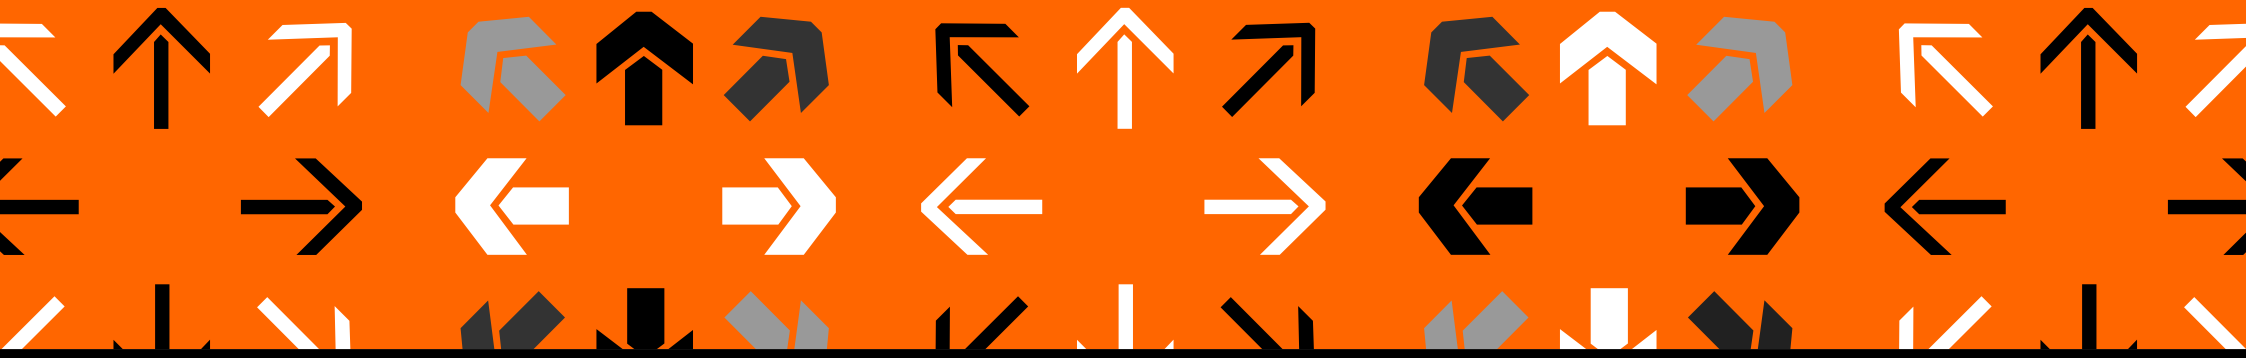

01

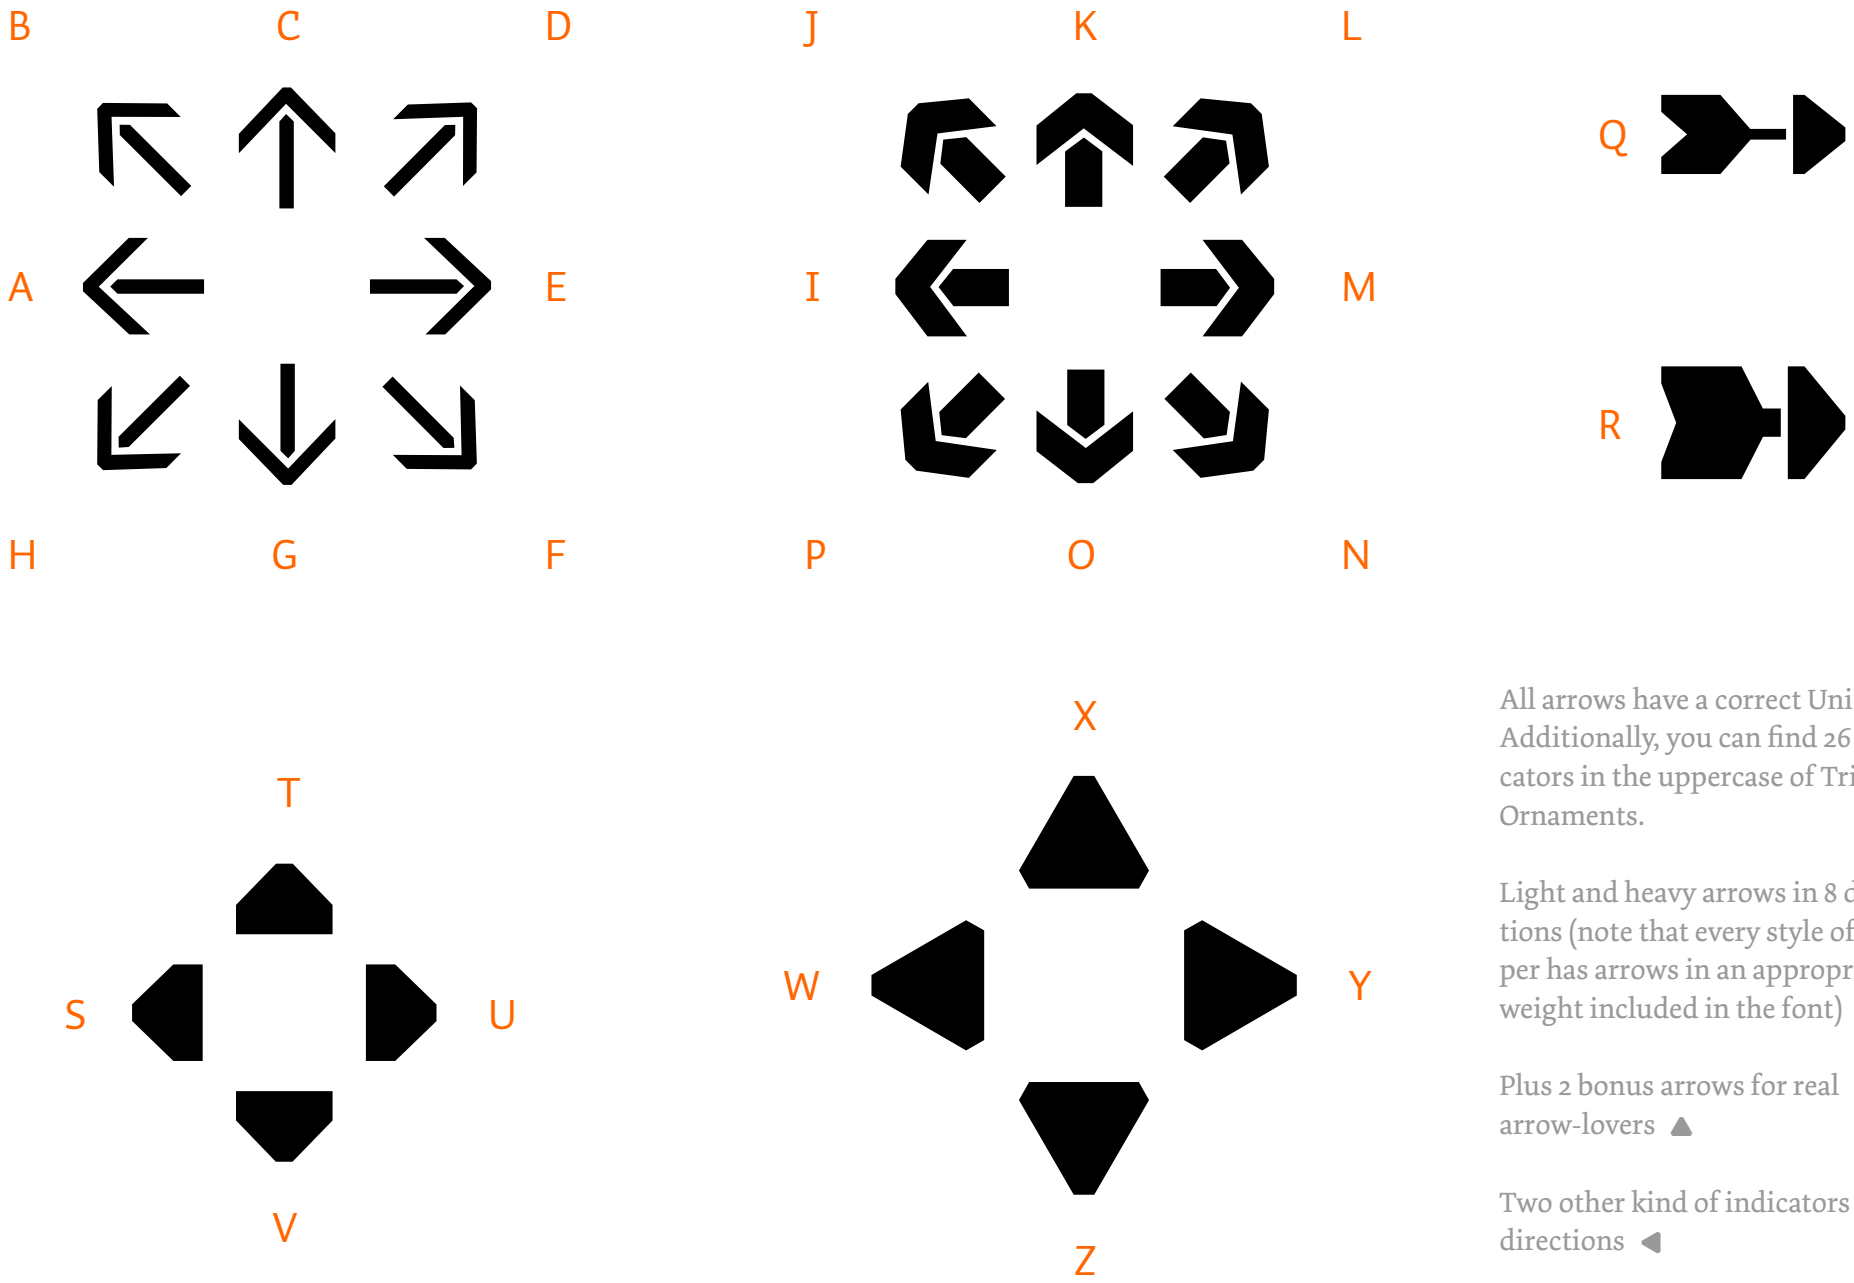

Indicators

Tripper Ornaments

Four kinds of
arrows in eight
directions

All arrows have a correct Unicode. Additionally, you can find 26 indicators in the uppercase of Tripper Ornaments.

Light and heavy arrows in 8 directions (note that every style of Tripper has arrows in an appropriate weight included in the font)

Plus 2 bonus arrows for real arrow-lovers ▲

Two other kind of indicators in 4 directions ◀

02

Hands

Tripper Ornaments

Pointing hands in 4 directions

Additionally: two different combinable blocks to extend the sleeve – one stencil block and one continuous stroke – for real manicure-lovers

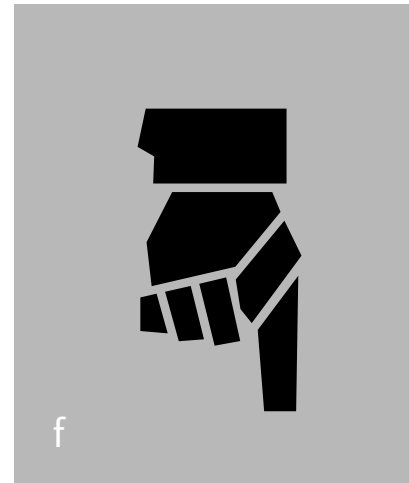

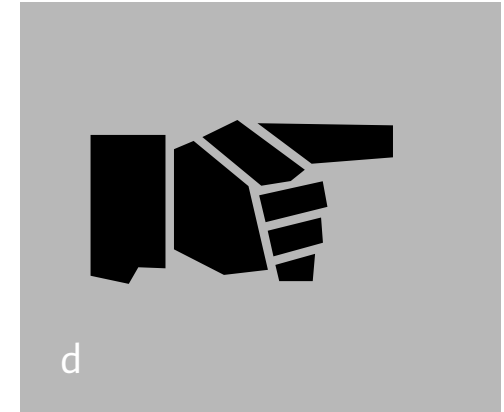

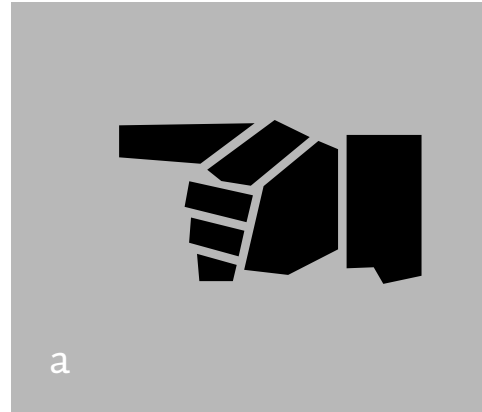

Plus, like it or not: thumbs up and down for real hand-lovers

+

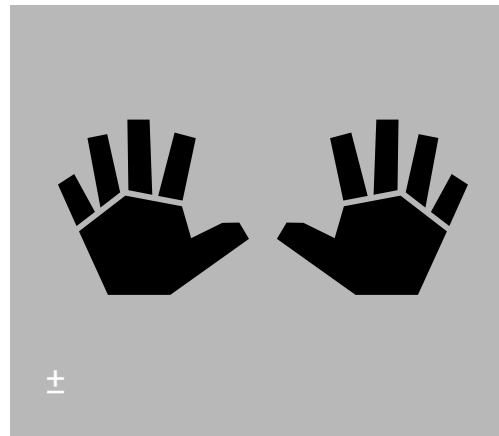

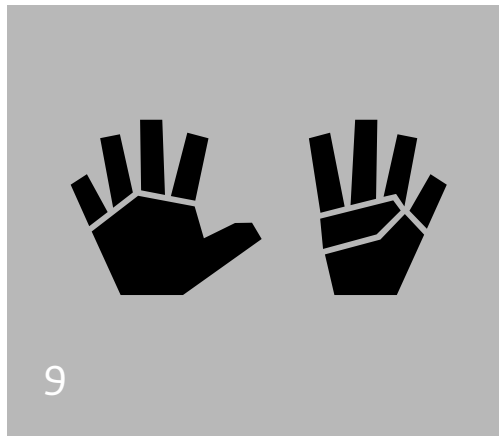

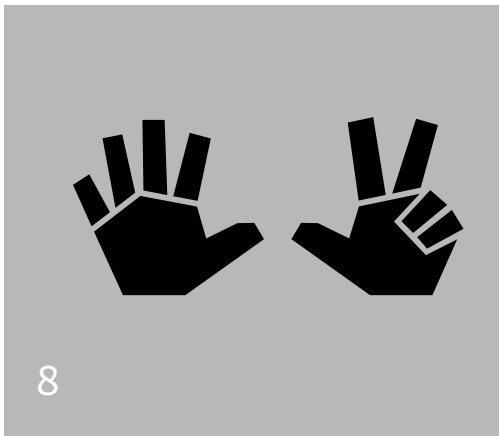

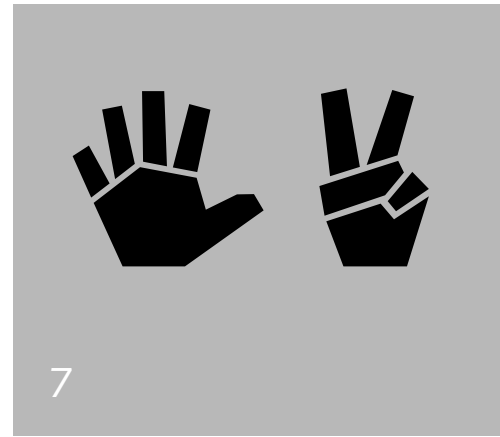

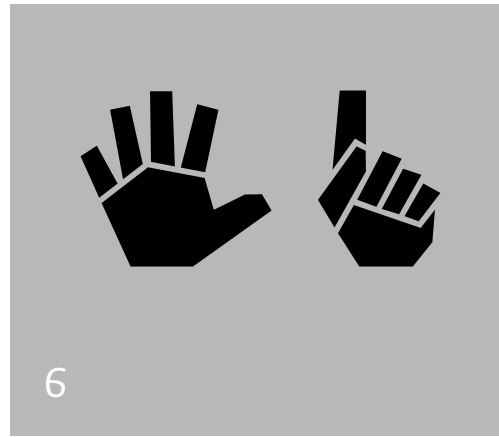

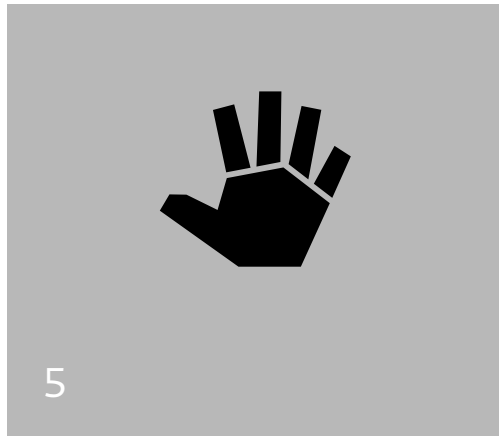

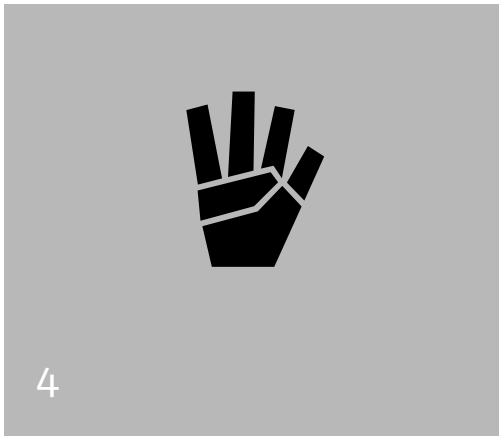

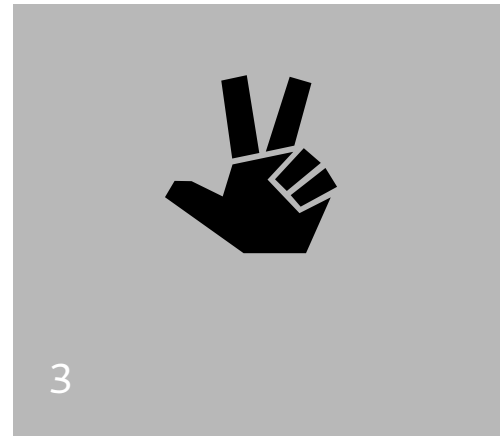

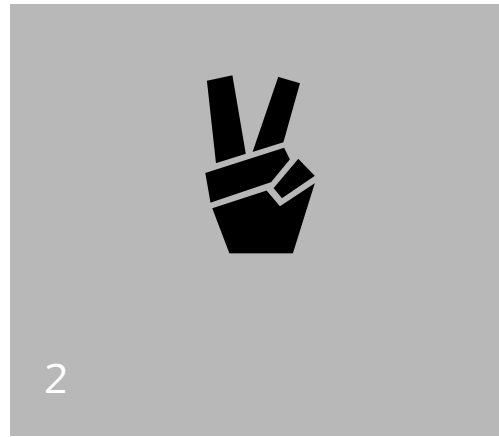

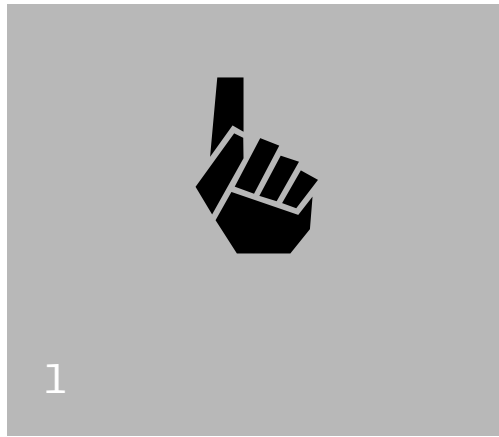

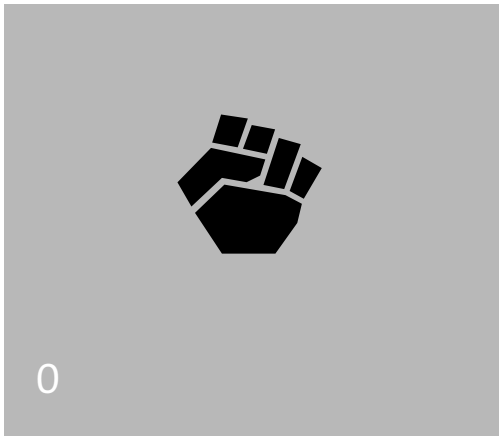

-

abbb

cccd

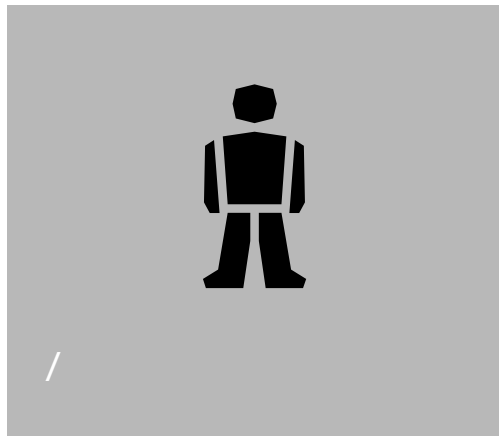

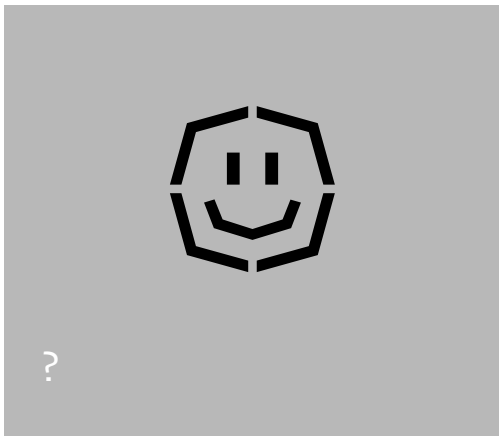

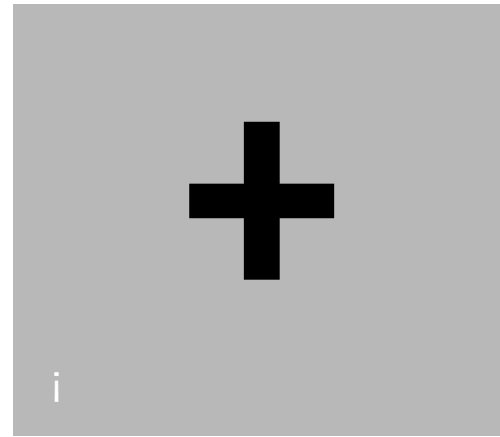

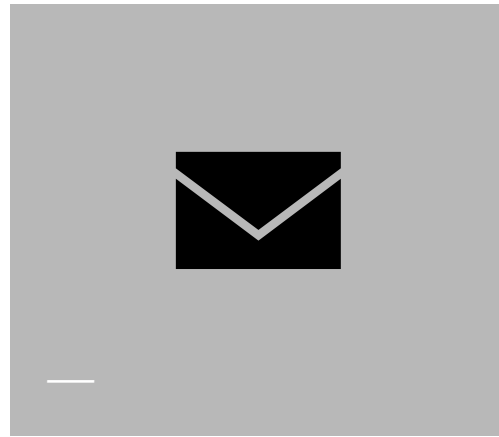

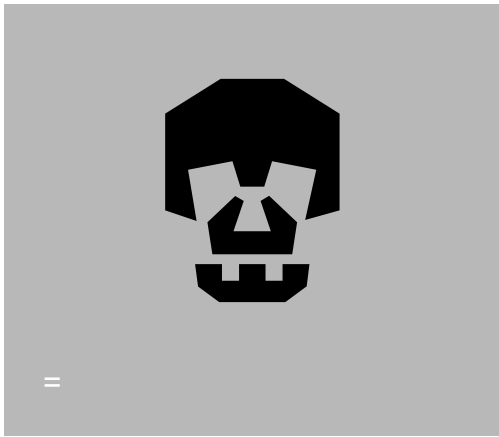

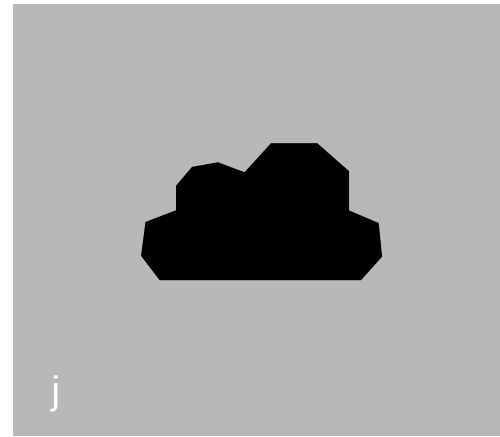

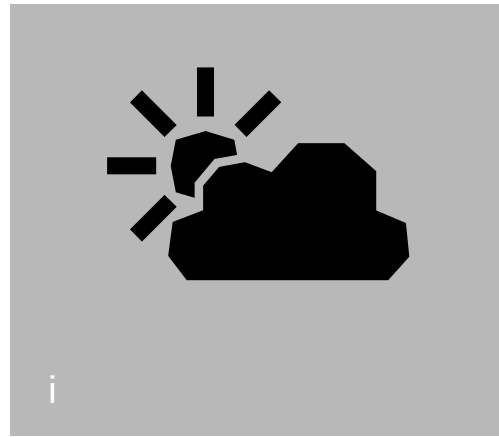

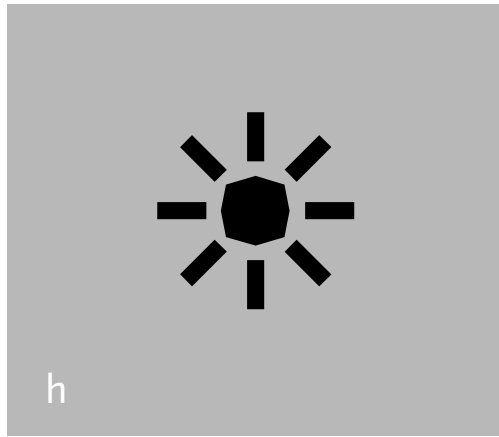

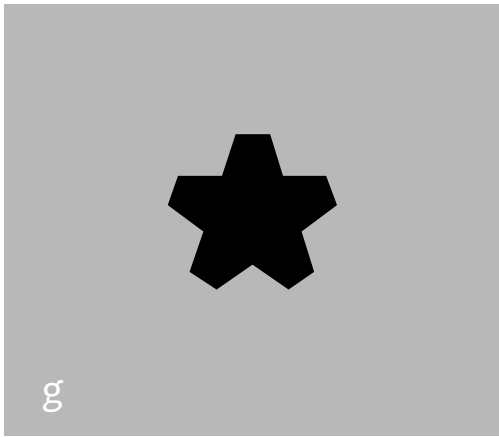

Counting hands
from zero to ten

Do the final countdown
in stencil style, but
– shibboleth alert! –
don't try this in China.
